Trade-marks Journal

Vol. 64 No. 3262

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Colour Claim

Colour is claimed as a feature of the trade-mark. The colour(s) blue, red, pink, violet, turquoise, green, orange, black, tan, white, and brown is/are claimed as a feature of the mark. The mark consists of a stylized depiction of a tan mermaid standing above the stylized black word ' TALISMANS' and wearing two white and black seashells held in place by blue straps and wearing a hat consisting of red stalks each ending with either a dark blue and violet star or circle on the end of each stalk. The mermaid is holding a turquoise and violet crescent moon in one hand. The tail of the mermaid consists of the colors blue, light green, dark green and violet. The mermaid's tail is blue at the top; then it transitions to light green, dark green, and violet at the bottom. Behind the mermaid are light brown trees with green leaves. Interspersed throughout the tree branches are violet stars and red and turquoise circles as well as three butterflies with turquoise and orange wings. The top half of the butterflies' wings are orange and the bottom half are turquoise. The stylized black word 'SEQUIN' appears in stylized letters in the center above the branches; the 'I' is dotted with a dark red circle. To the right and left of the mermaid are plants with green leaves and red and pink flowers with small white circles. The mark in its entirety appears on a transparent background.

Medical equipment, namely, membranes made of polymers in the form of hollow fibers for separation processes for use in medical apparatus for blood treatment, namely, dialysis filters, hemodiafilters, hemofilters. endotoxin filters, plasmapheresis filters, blood oxygenators, microfiltration, ultrafiltration, and sterilization units for medical purposes, air filtration for medical ventilators; Membranes made of synthetic or regenerated polymers in the form of hollow fibers, tubing, piping and film for separation processes, and modules equipped with the aforesaid membranes for use in medical apparatus, namely, dialysis and plasmapheresis filters in the nature of hemodialysers, hemofiltration, hemofiltration modules, hemodiafiltration, hemodiafiltration modules, endotoxin filtration modules, plasmapheresis modules, and hemoconcentration modules; Medical equipment, namely, membranes, capillary membranes and flat membranes, and modules containing said membranes as part of medical equipment, namely, gas separators and oxygenators for the supply of oxygen to blood or the

removal of carbon dioxide from blood; Medical equipment, namely, membranes, capillary membranes and flat membranes, and modules containing said membranes as part of medical equipment, namely, dialysis and plasmapheresis filters in the nature of hemoconcentration apparatus, hemodialysis apparatus, hemodiafiltration apparatus, plasmaphereis apparatus, oxygenators, and plasmafractionation; Membranes in the nature of hollow fibers for medical therapeutic purposes; Membranes in the nature of hollow fibers for medical therapeutic purposes, sold empty, for use in for blood filtration, hemodialysis, hemofiltration, hemodiafiltration, and oxygenation.

Class 11

(5) Filtration and separation apparatus for cleaning and purifying air, gases and liquids, namely, a membrane contactor comprised of microporus hollow fibers for conducting mass transfer operations, membrane separation and transferring dissolved gases to or from a fluid stream; fibrous filtering media for general industrial use in the purification of air and industrial fluids; separators for the cleaning and purification of air; separators for the cleaning and purification of gases; filters for industrial, commercial and domestic water filtration; industrial water purifying apparatus; water filtering units for commercial and industrial use; water purification units; water treatment equipment, namely water cartridge filtration units for commercial and industrial use; filters for industrial use in water filtration, water purification and liquid filtration; filter membranes used in microfiltration and ultrafiltration; water, liquid and fluid purification equipment, namely microfiltration units and ultrafiltration units used to filter impurities from liquids in pharmaceutical, biotech, food and beverage, industrial, and healthcare applications.

(6) Membrane separation apparatus for cleaning and purifying gases and liquids, namely, a membrane contactor comprised of microporous hollow fibers for conducting mass transfer operations, membrane separation and transferring dissolved gases to or from a fluid stream; Fibrous filtering media for general industrial use in the purification of air and industrial fluids; Filtering for cleaning and purifying air, gases, and liquids, namely, a membrane contactor comprised of microporous hollow fibers for conducting membrane separation and transferring dissolved gases to or from a fluid stream in the nature of liquid filters; Separators for the cleaning and purification of air in the nature of air filters for industrial installations; Separators for the cleaning and purification of gases in the nature of air filters for industrial installations; Filters made of fiber for industrial, commercial and domestic water filtration; industrial-water purifying apparatus; Water filtering units for commercial and industrial use; Water purification units; Water treatment equipment, namely water cartridge filtration units for commercial and industrial use; Filters for industrial use in water filtration, water purification and liquid filtration namely, membrane filters for filtering liquids; Filters for high purity water and liquid filtration for commercial and industrial use, namely membrane filters for filtering liquids; Filter membranes used in water microfiltration and ultrafiltration; Water, liquid and fluid purification equipment, namely microfiltration units and ultrafiltration units used to filter impurities from liquids, water, and others, in the nature of air, gas, and liquid purification in pharmaceutical and biotech applications, in food and beverage applications, in industrial applications and in the healthcare area.
